## Software Developer

I am a highly motivated individual who is passionate about Software engineering and Web Development, I am a Master's student seeking to further my skills and knowledge in the field. I have a strong background in programming languages such as Java, C#, C++, JavaScript, SQL and Python. I have a keen eye for detail and a drive to constantly improve. My technical strengths lie in web and desktop application development, computer systems administration and database management while I also possess great non-technical strengths such as great leadership, communication, and interpersonal skills.

## EXPERIENCE

### Aurora OS (Russia)

**Backend Developer** | 🗓 January 2024 – August 2024

- Led technical decision-making for sprint planning, story grooming, task and story point assignment with the project manager and stakeholders using GitHub issues and Confluence to document processes and specifications and ensure timely delivery of tasks.
- Developed a flask API for a location-based server (LBS) for the Aurora operating system.
- Designed and implemented the database to store cell tower data and optimized the database to improve cell tower retrieval speeds.
- Handled the development operations of CI/CD by setting up automated unit tests and employing Ruff and Hadolint to ensure the code adhered to Python coding standards, helping to ensure clean, consistent, and error-free code.
- I documented the codebase comprehensively by creating Markdown files that detail the main setup and functionality, ensuring easy understanding of the project and facilitating contributions. Additionally, I documented the project's architecture with diagrams illustrating module interactions for enhanced clarity.
- Stack worked with: Python, Flask, Docker, C++.
- Worked as a Python backend developer and a database designer for a location-based server (LBS) for the Aurora operating system.
- Handled the development operations of CI/CD and testing.

Stack worked with: Python, Flask, Postgres, GitHub Actions, C++

### Innopolis Labs (Russia, Remote)

**Software Engineer** | 🗓 July 2024 – September 2024

- Worked on documenting and testing CheetahML - a platform for deploying and running AI models.
- Revised and optimized the platform's architecture to ensure compatibility with Kubernetes.
- Set up the environment for performance testing.
- Conducted performance testing and evaluated the system's performance based on its current architecture.
- Proposed architectural changes to enable dynamic resource allocation in a running system by redistributing resources between models, resulting in over a 12% decrease in response times.

Stack worked with: Python, Docker, Kubernetes, Prometheus, Grafana.

### Neoflex (Russia)

**Software Engineer Intern** | 🗓 February 2023 – July 2023

- Designed and Implemented an API for a shopping mobile application using Spring Boot resulting in sub 300 ms API response times.
- Designed the database and administered it throughout the project's lifespan resulting in optimal data retrieval and write times.

Stack worked with: Java, Spring, Postgres.

## SKILLS

**Programming Languages:** Java, Python, C#, SQL, JavaScript

**Databases:** PostgreSQL, Oracle DB, MySQL

**Frameworks and other tools:** Spring Boot, Kafka, Redis, RabbitMQ, ASP.NET, React JS, Flask, Fast API, Django, Next JS, Git, Rest API, Docker, Kubernetes, Junit, HTML, CSS

**CI/CD :** Jenkins, GitHub Actions

**Software Engineering Processes:** Agile, Scrum, Requirements Elicitation and Specification, Architecture Design, Unit Testing

**Soft Skills:** Team player & Leader, Good communicator, Problem solver and highly analytical

## EDUCATION

**Master of Science (M.S.) in Software Engineering, 2025**

[Innopolis University](#), Innopolis, Russia

**Relevant coursework:** Software Development processes and methodologies, Team management, Requirements Engineering, Continuous Integration and Deployment, Agile methodologies.

Worked in several group projects where I played a team leader and foresaw the software development process.

**Bachelor of Science (B.S.) in Software and Administration of Information Systems, 2019- 2023**

[Voronezh State University](#), Voronezh, Russia

**Relevant coursework:** Phase Direction Finder and Radio Waves Simulation, Data Structures and Algorithms.

– Developed proficiency in various programming languages, including C++, C#, Java, Python, and SQL through my various coursework's and practical projects.

## LANGUAGES

English (Native)

Russian (C1)
